

Trimble[®] VRS Now[™] GNSS Rebate Bundle

Trimble VRS Now has created a new dynamic in surveying markets. Because VRS corrections are available on demand, more surveyors can easily access centimeter-accuracy instantly – without the cost or complexity typically required for traditional RTK. The result has been a marked increase in demand for GNSS surveying rovers in areas where Trimble VRS Now is available.

To further promote the synergies between Trimble VRS Now service and Trimble GNSS surveying systems, Trimble is offering a limited time promotional rebate on combined subscriptions and rover systems.

Credit on New GNSS Rover Systems

Through this program, new subscribers of Trimble VRS Now Unlimited Annual service can receive an instant rebate toward the purchase of a Trimble GNSS rover system.

Rebate applies to purchase of complete rover system:

- Rover: Trimble R8[®] GNSS receiver or Trimble R6 GPS receiver
- Controller: Trimble TSC2 or Trimble TCU data collector

Two bundle options available:

1. Trimble R8 GNSS Bundle Rebate equivalent to 9 months of Trimble VRS Now service
2. Trimble R6 Bundle Rebate equivalent to 6 months of Trimble VRS Now service
